ABOUT ME

Highly skilled blockchain developer with over 5 years experience in the tech space working mostly as a full stack web developer. I have had the opportunity to work in various tech areas such as Fintech, Blockchain, and Management systems. Driven to solve problems through intense research-driven processes that turn business innovations into practical solutions through development. I am currently developing for the future of the Internet.

EXPERIENCE

IdeaCloud Nigeria, Lagos, Nigeria — *Lead Developer*

FEBRUARY 2021 - PRESENT

- I design and develop static portfolio websites for small brands and businesses.
- I developed a dynamic web application for a food delivery business.
- My team worked on program flow and research for projects.
- I coordinated a team of designers and developers to work on a project launch from start to finish.

Google(TensorFlow.js), Remote — *Campus Influencer(Volunteer)*

JANUARY 2022 - PRESENT

- I create content for the promotion of the use of TensorFlow.js in the local developer community.
- I develop small machine learning projects to teach students on how to use TensorFlow.js in their web Projects.
- I am currently developing a facial recognition web app to facilitate enhanced security on websites.

University of Ilorin COMSIT, Kwara, Nigeria — *Full Stack Developer(Intern)*

NOVEMBER 2021 - MAY 2022

- I coordinated a small team of developers and designers to build a web-based employee management system for institutions.
